EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

This application is in condition for allowance except for the presence of claims 1-18, 31, and 32 directed to an invention nonelected without traverse. Accordingly, claims 1-18, 31 and 32 have been canceled.

The following is an examiner's statement of reasons for allowance:

Claims 19-21, 23-30 and 34 are allowable over the prior art of record because the prior art of record does not teach the claimed subject matter including depositing one or more layers on a substrate in a sputtering chamber comprising a sputtering system comprising a target, a linear ion source, and a conveying system, comprising conveying the substrate through the sputtering chamber, depositing at least one dielectric thin-film layer on the substrate by sputtering with the sputtering system comprising the target, generating at least one ion beam coming from the ion source in the sputtering chamber in the presence of the sputtering system comprising the target, and adjusting the refractive index of the dielectric layer by modifying the angle between the ion beam and the surface of the substrate and/or modifying the voltage applied to the ionic source, wherein the density of the dielectric layer deposited on the substrate is preserved.

The closest prior art to Lerbet et al. (U.S. Pat. 5,569,362) while teaching utilizing an ion beam to change the refractive index of the film does not teach utilizing a linear ion source to adjust the refractive index of the dielectric layer by modifying the angle between the ion beam and the surface of the substrate and/or modifying the voltage applied to the ionic source, wherein the density of the dielectric layer deposited on the substrate is preserved.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney G. McDonald whose telephone number is 571-272-1340. The examiner can normally be reached on M-Th with every Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nam X. Nguyen can be reached on 571-272-1342. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
